

Energy Cost Monitoring (ECM)

Nomura Lab at Keio Economic Observatory (KEO), Keio University, Tokyo

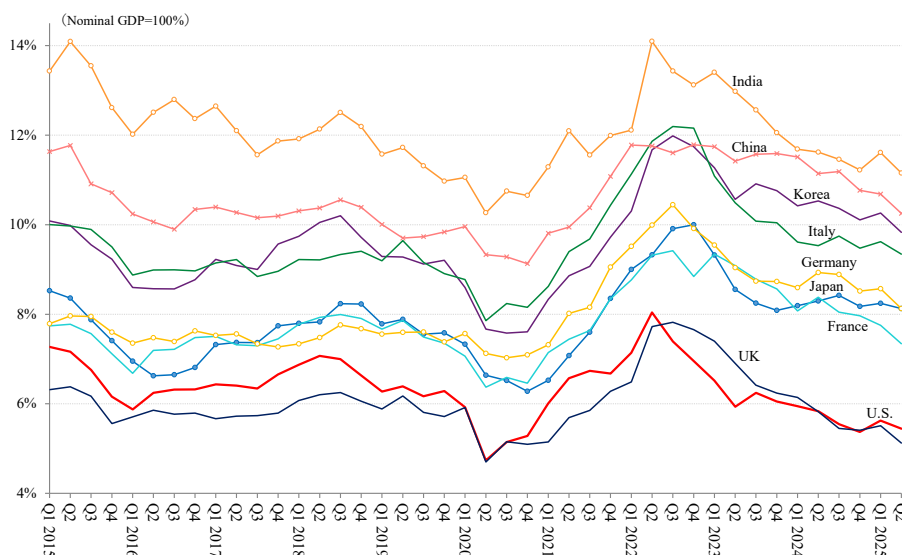

ECM_202510

November 1, 2025

Koji Nomura, Sho Inaba, and Mansaku Yoshida.

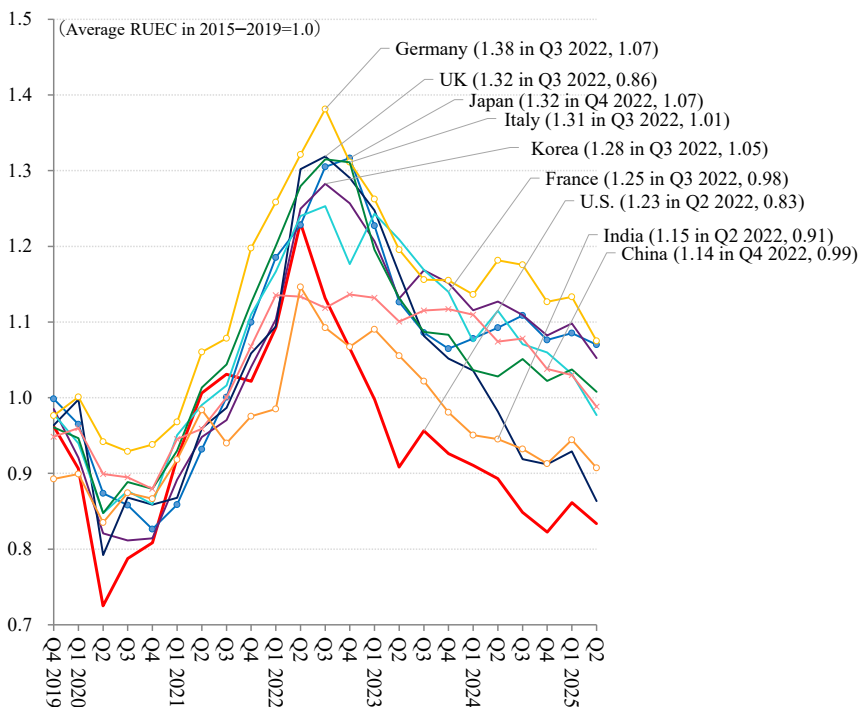

1 RUEC (Real Unit Energy Cost)

1.1 RUEC Levels

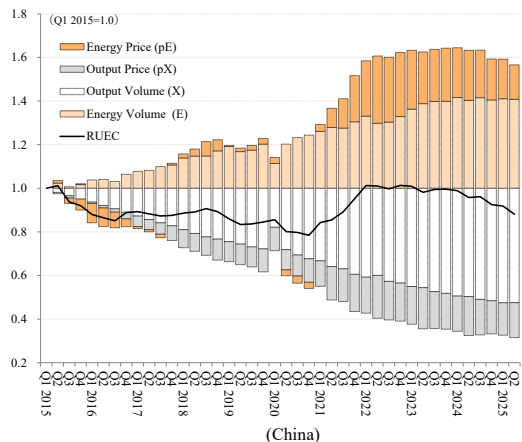

Unit: Share (GDP at current market prices in each period=100% in each country). Period: Q1 2015–Q2 2025. Notes: The prices are seasonally adjusted and include taxes and subsidies. The volumes are seasonally adjusted.

1.2 Post-Pandemic RUEC Indices

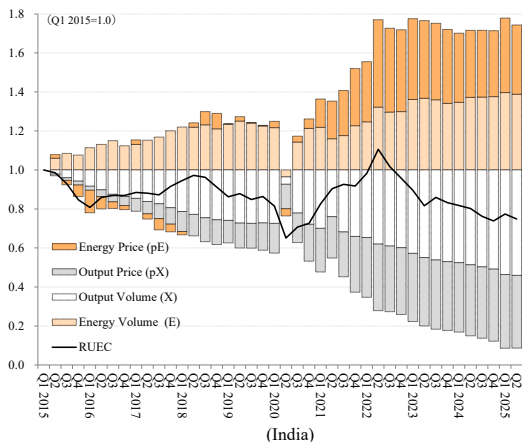

Unit: Index (average RUEC in 2015–2019=1.0 in each country). Period: Q4 2019–Q2 2025. Notes: The counts after the country name indicate the peaks in RUEC surges and the recovered level as of Q2 2025 relative to the pre-pandemic level. The prices are seasonally adjusted and include taxes and subsidies. The volumes are seasonally adjusted.

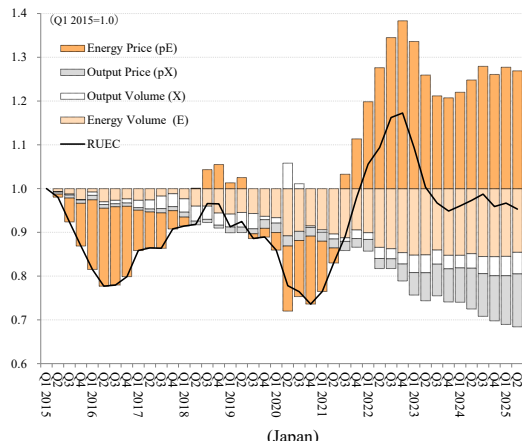

1.3 RUEC Decomposition • Asia (China, India, Japan, and Korea)

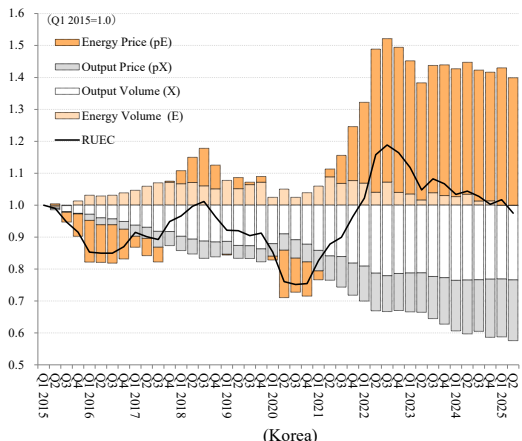

(China)

(India)

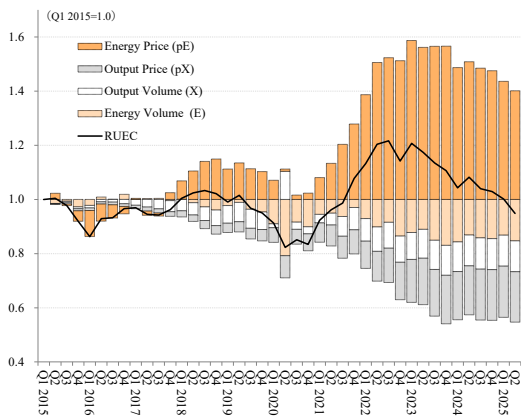

(Japan)

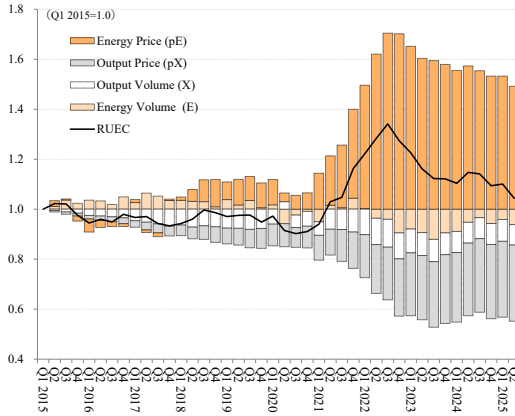

(Korea)

Unit: Index (RUEC in Q1 2015=1.0). Period: Q1 2015–Q2 2025. Notes: The prices are seasonally adjusted and include taxes and subsidies. The volumes are seasonally adjusted.

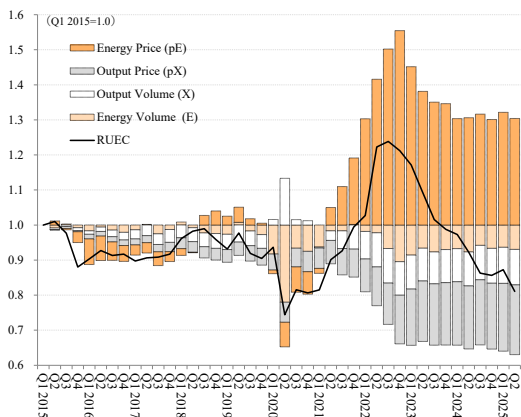

• EU (France, Germany, and Italy), the UK, and the U.S.

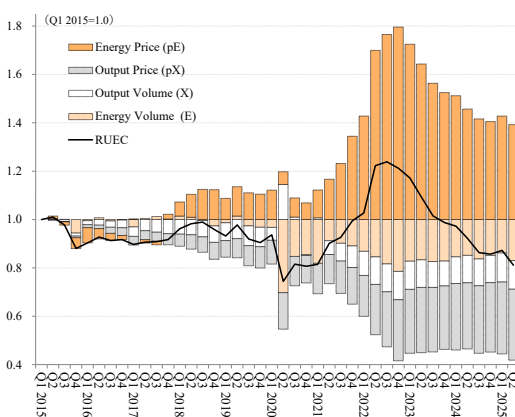

(France)

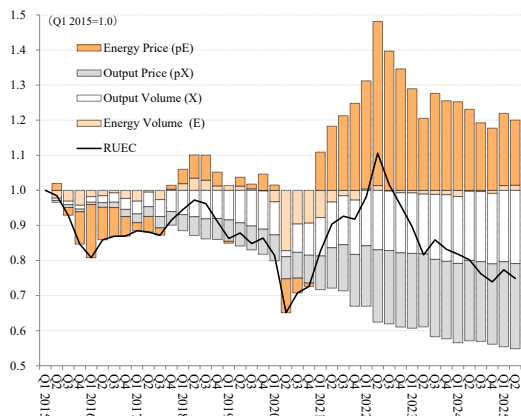

(Germany)

(Italy)

(the UK)

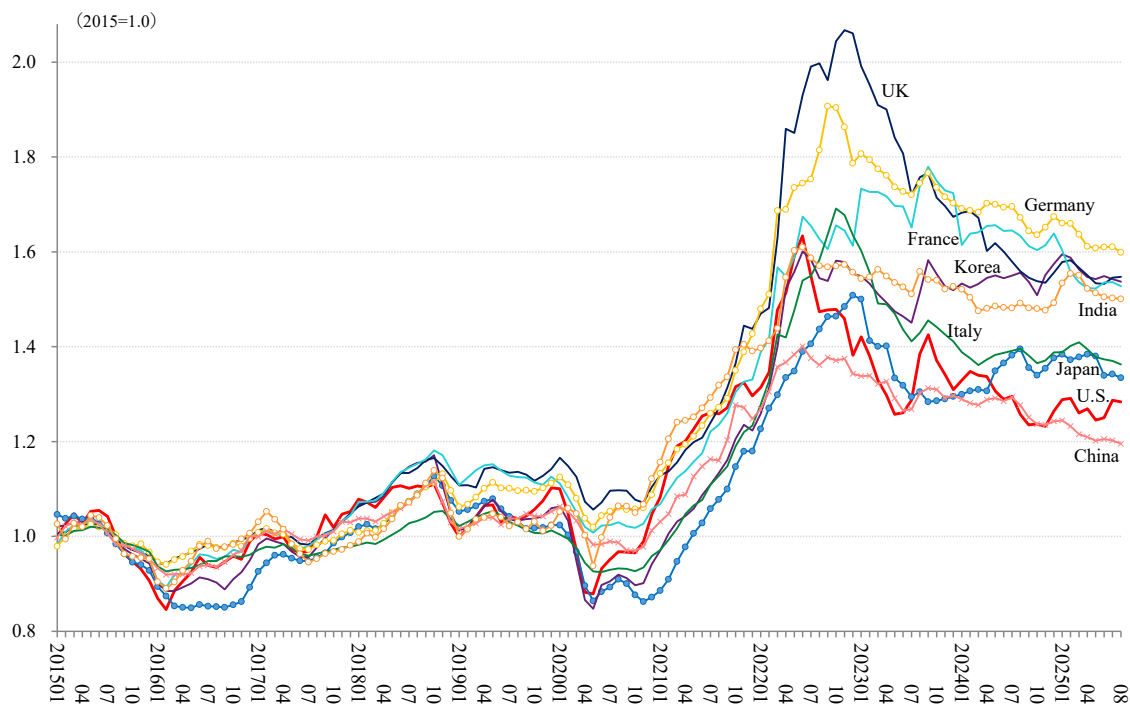

(the U.S.)

Unit: Index (RUEC in Q1 2015=1.0). Period: Q1 2015– Q2 2025. Notes: The prices are seasonally adjusted and include taxes and subsidies. The volumes are seasonally adjusted.

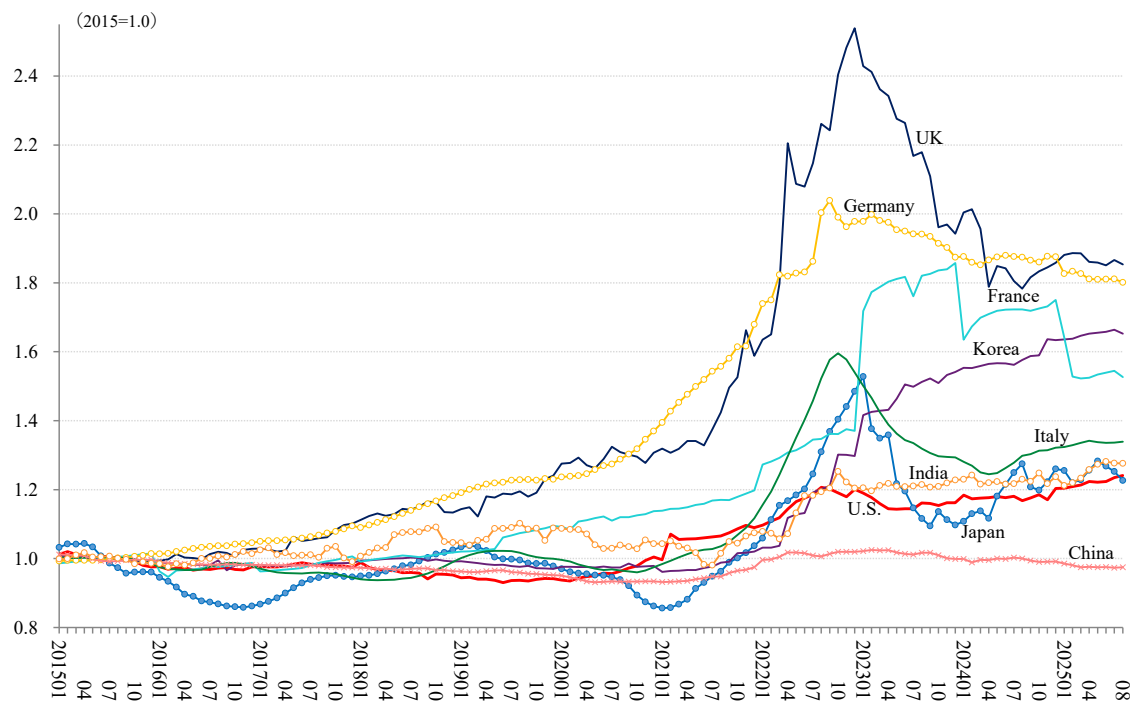

2 Energy Prices

2.1 Quality-adjusted Energy Prices for Final Use

Unit: Index (average price at local currency unit in 2015=1.0 in each country). Period: January 2015– August 2025. Notes: Quality-adjusted energy price is defined as the implicit Translog index. The prices are seasonally adjusted and include taxes and subsidies.

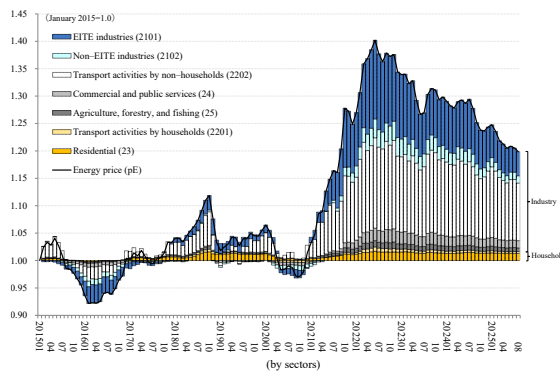

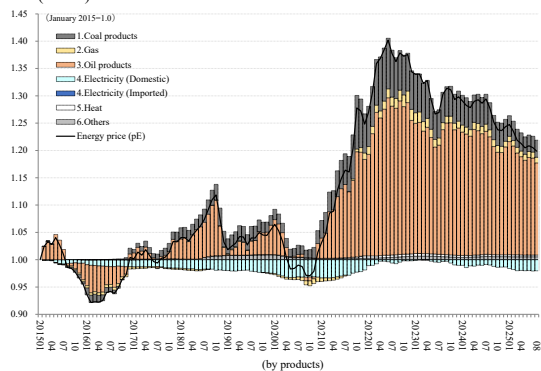

2.2 Electricity price

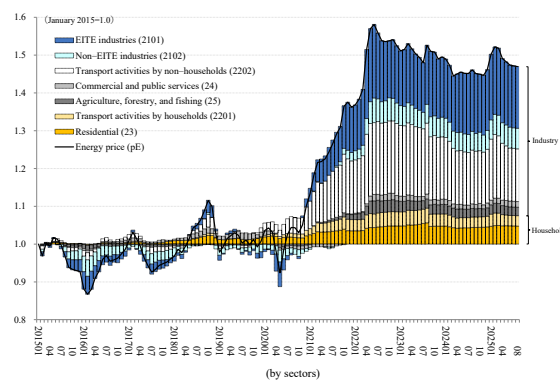

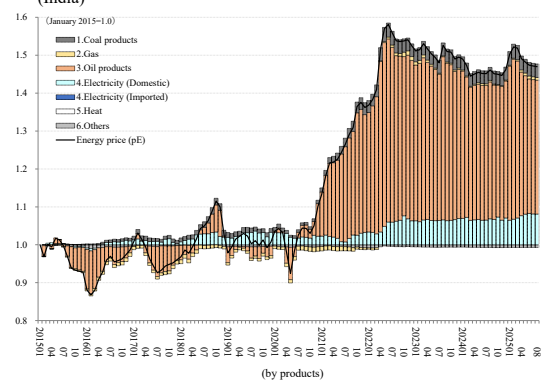

Unit: Index (price at local currency unit in 2015=1.0 in each country). Period: January 2015– August 2025. Notes: Energy price is defined as the implicit Translog index. The prices are seasonally adjusted and include taxes and subsidies.

2.3 Sources of Energy Price Changes • Asia (China, India, Japan, and Korea)

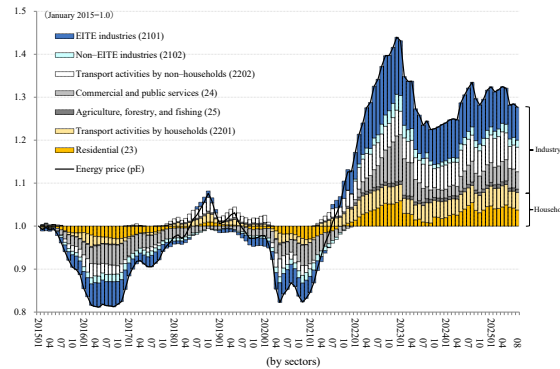

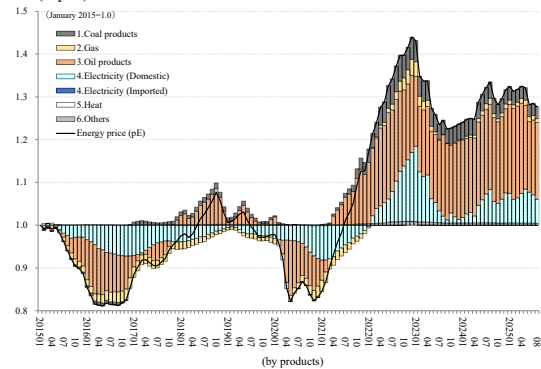

(China)

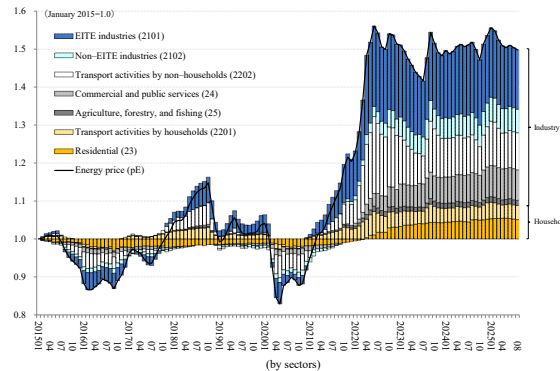

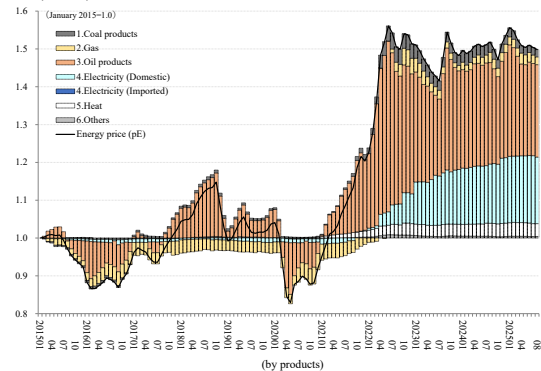

(India)

(Japan)

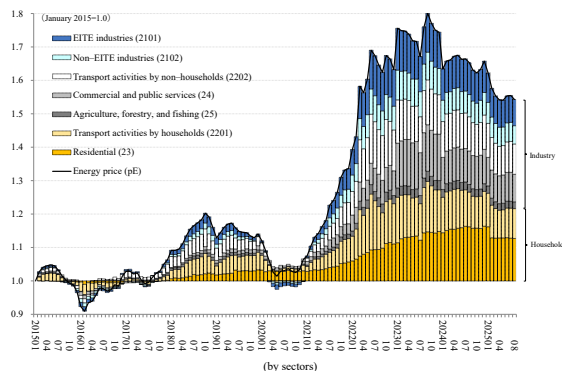

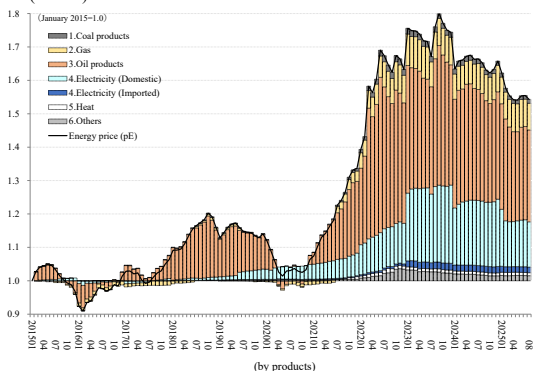

(Korea)

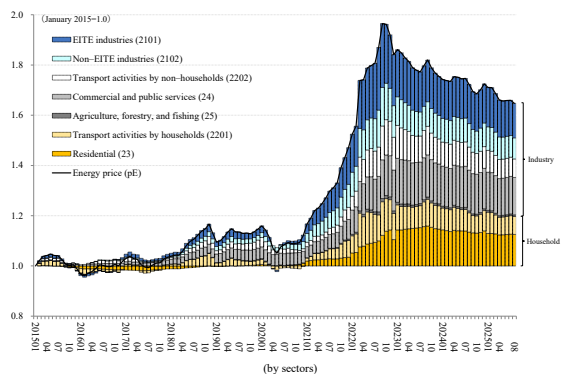

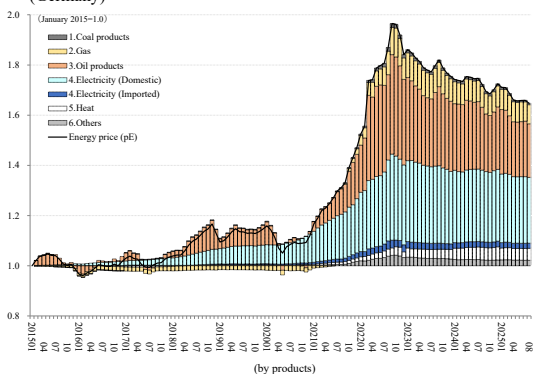

Unit: Index (price at local currency unit in January 2015=1.0 in each country). Period: January 2015– August 2025. Note: The prices are seasonally adjusted and include taxes and subsidies.

• EU (France, Germany, and Italy), the UK, and the U.S.

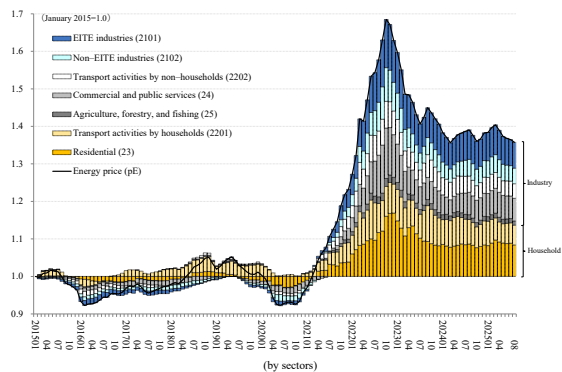

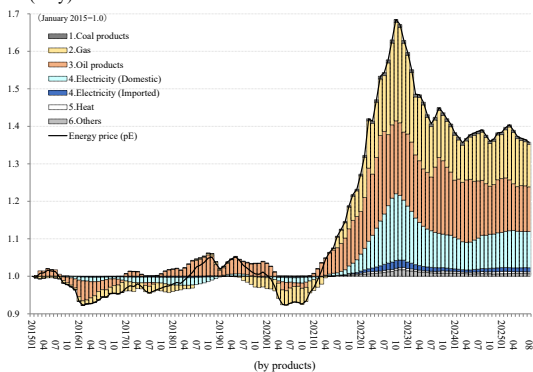

(France)

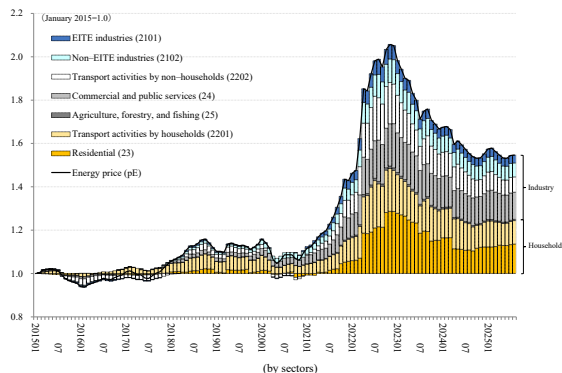

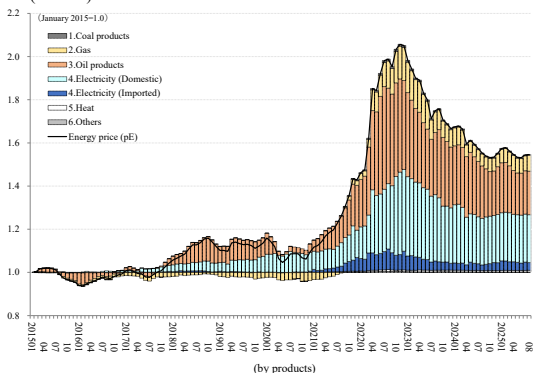

(Germany)

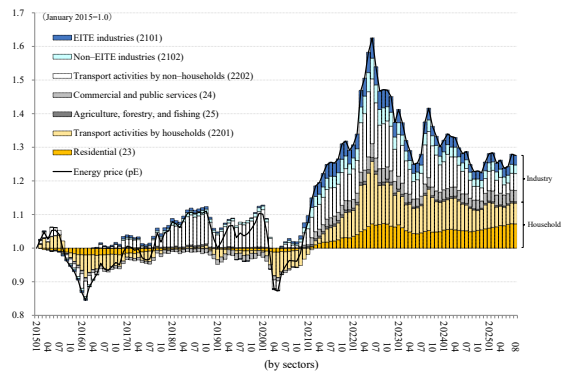

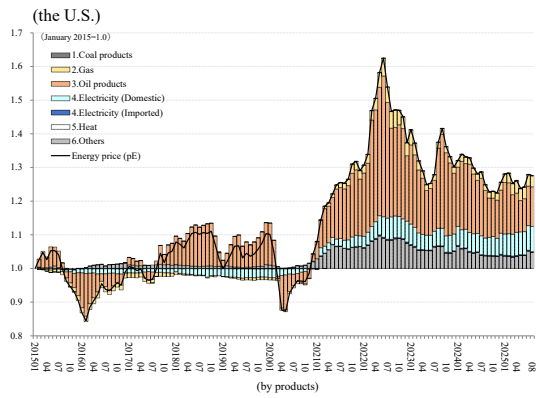

(Italy)

(the UK)

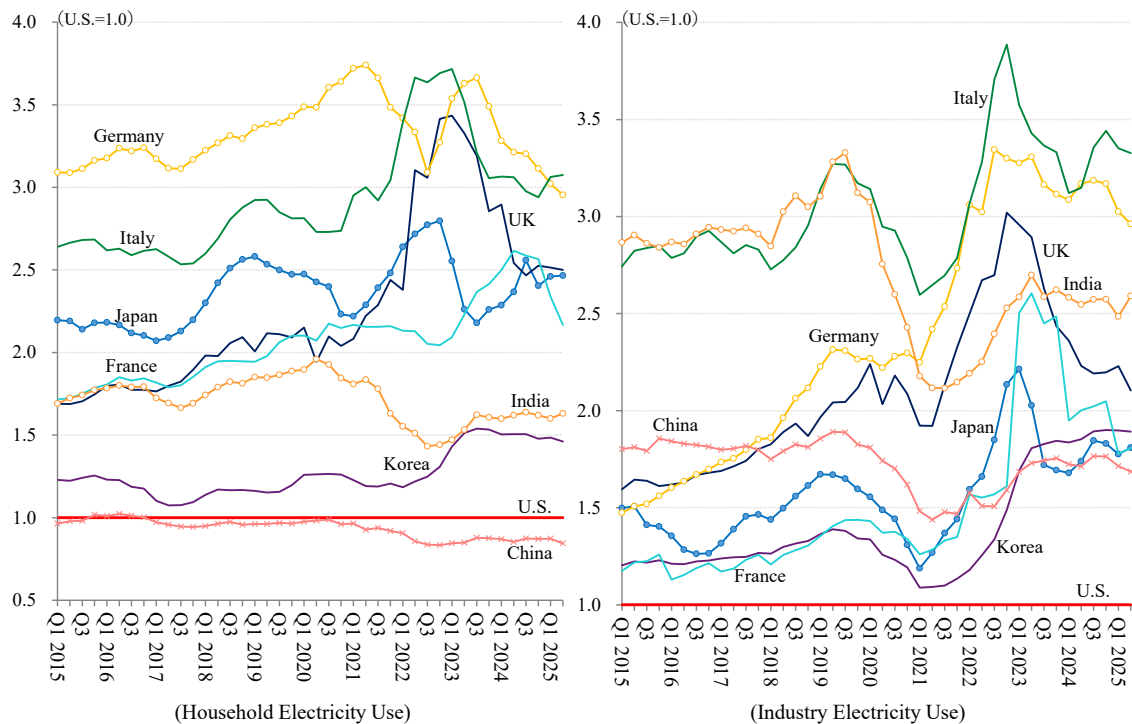

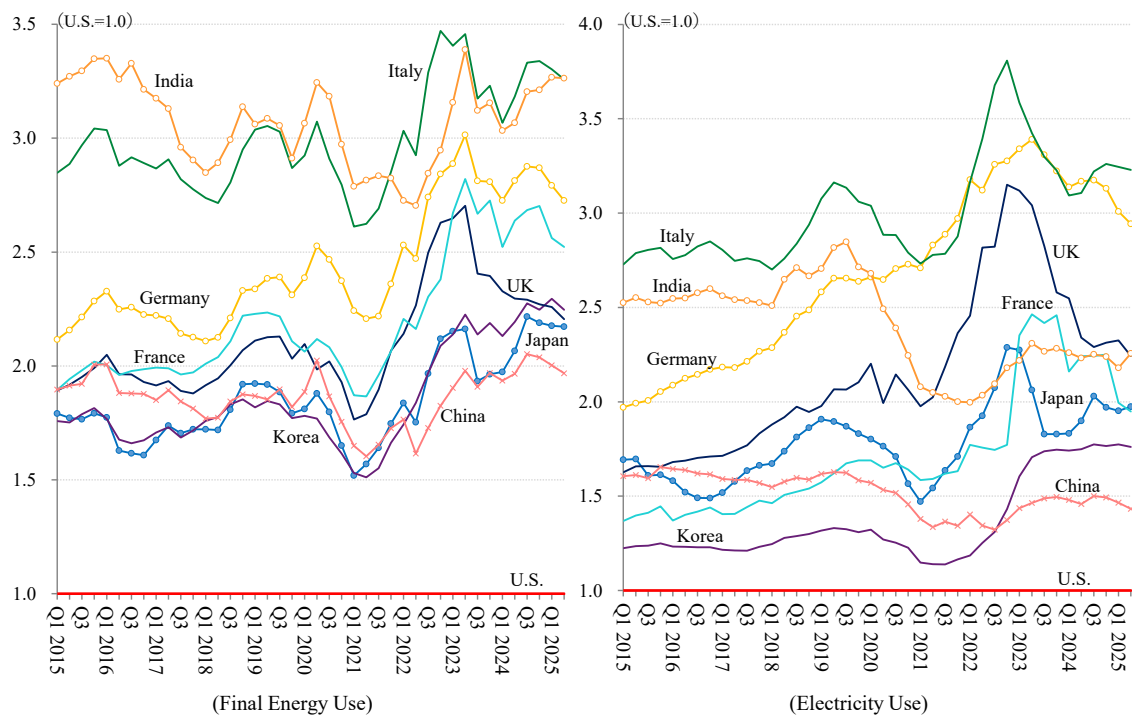

Unit: Index (price at local currency unit in January 2015=1.0 in each country). Period: January 2015– August 2025. Note: The prices are seasonally adjusted and include taxes and subsidies.

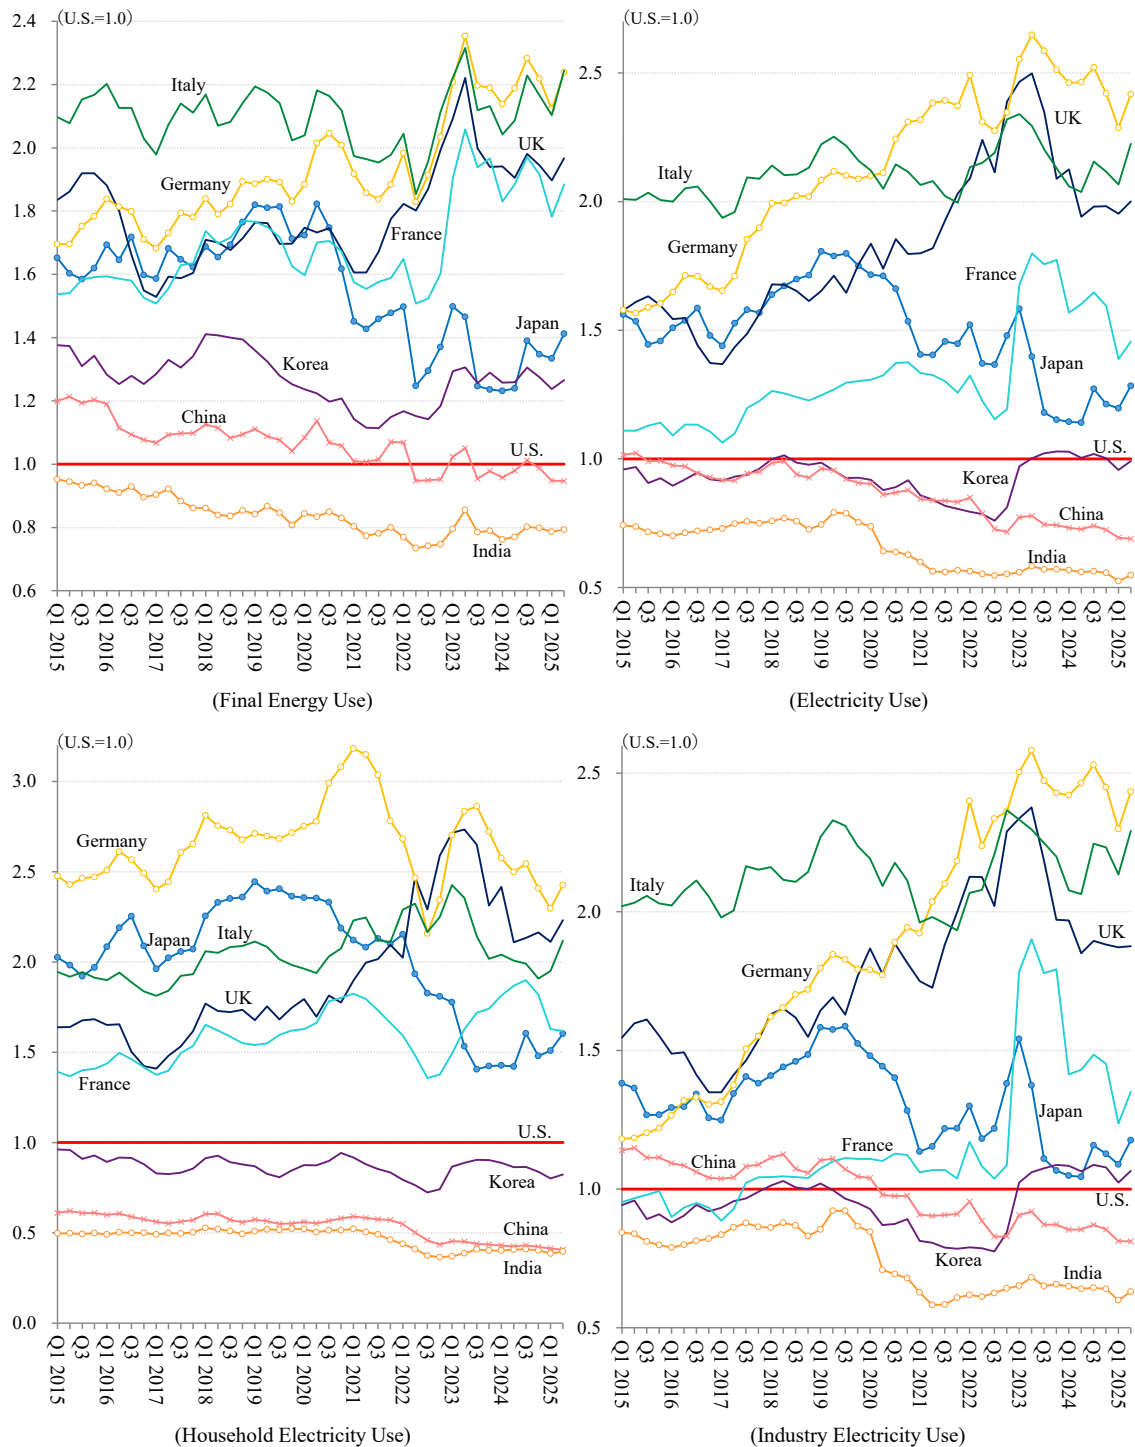

Unit: Index (price at local currency unit in January 2015=1.0 in each country). Period: January 2015– August 2025. Note: The prices are seasonally adjusted and include taxes and subsidies.

3 Real PLI

Unit: Index (the U.S. REP in each period=1.0). Period: Q1 2015–Q2 2025. Notes: The prices are seasonally adjusted and include taxes and subsidies.

4 Nominal PLI

Unit: Index (the U.S. in each period=1.0). Period: Q1 2015–Q2 2025. Notes: The prices are seasonally adjusted and include taxes and subsidies.

5 Nominal/Real PLI Matrix
(Nominal PLI)

	(5%)	(4%)	(21%)	(24%)	(21%)	(20%)	(12%)	(11%)	(0%)

Unit: Bilateral ratios, reference country = 1.0. Notes: For each cell, the upper figure refers to Q2 2025, the lower figure to the pre-pandemic average (2015–2019), and the value in parentheses shows the log-growth from the pre-pandemic average, computed to preserve transitivity in bilateral comparisons. Cells in blue indicate a relative narrowing of the gap of the comparison country vis-à-vis the reference country, whereas cells in red indicate a widening.

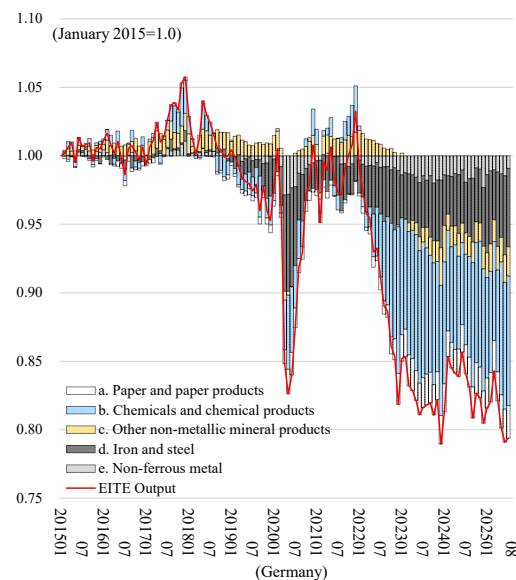

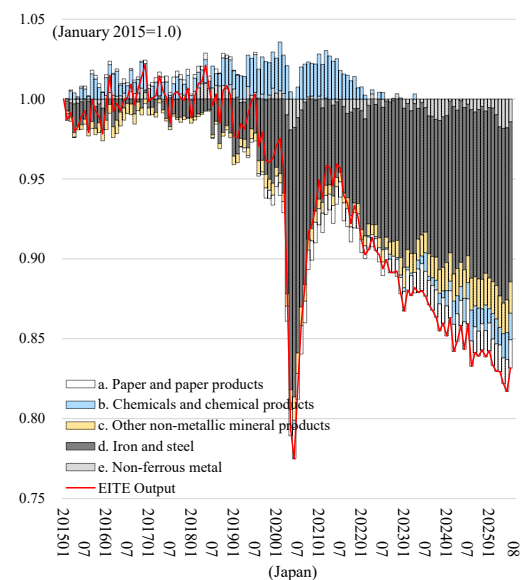

6 EITE Output

6.1 EITE Outputs

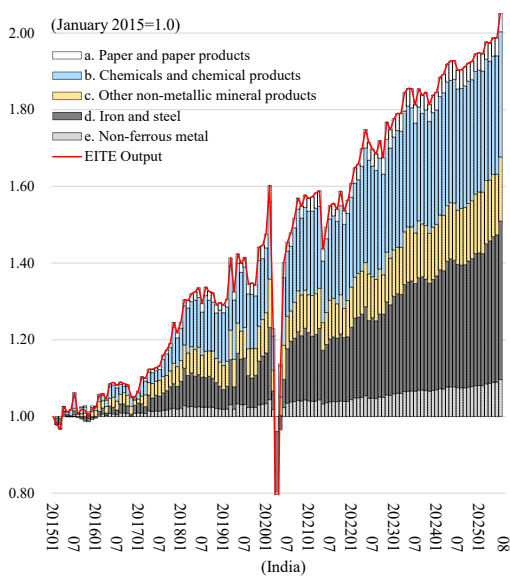

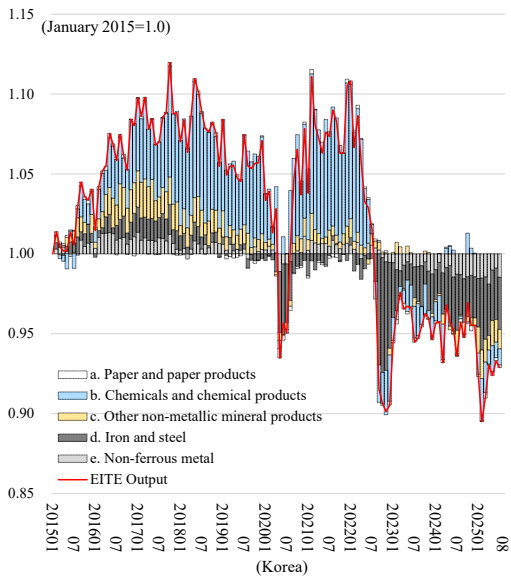

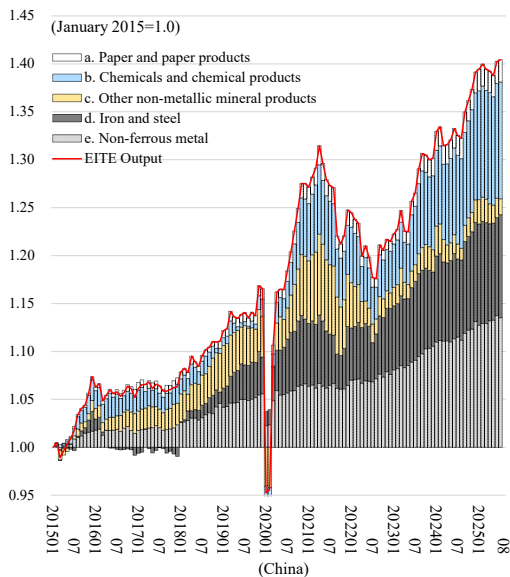

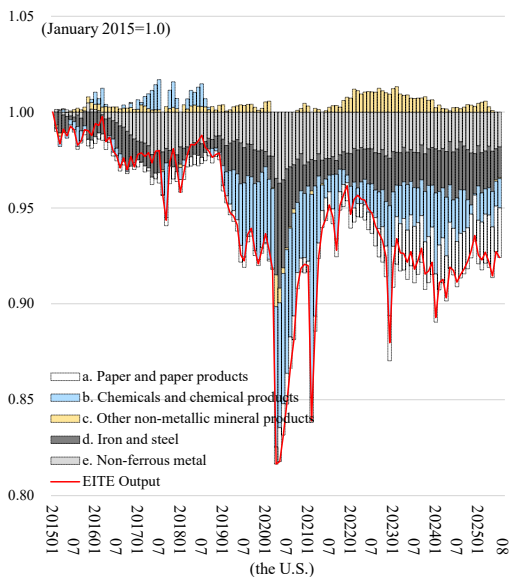

Unit: Index (output in January 2015=1.0). Period: January 2015– August 2025. Notes: EITE manufacturing are defined as Paper and paper products, Chemicals and chemical products (excluding pharmaceuticals), Other non-metallic mineral products, Iron and steel, and Non-ferrous metal. Non-EITE manufacturing are all other manufacturing industries. Indices.

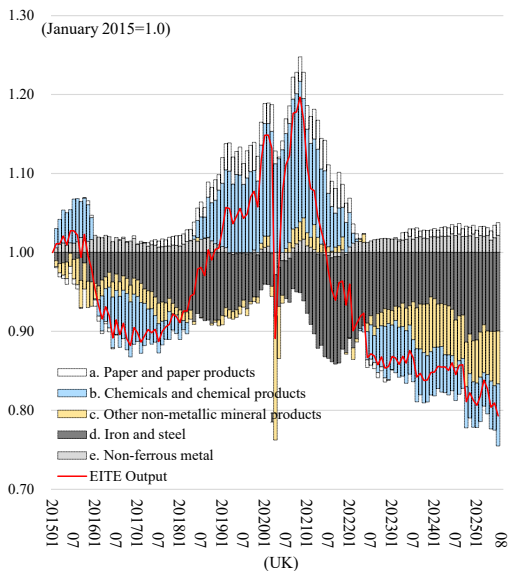

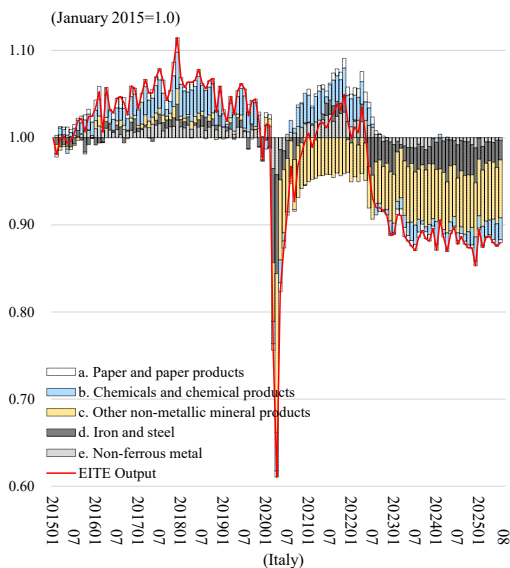

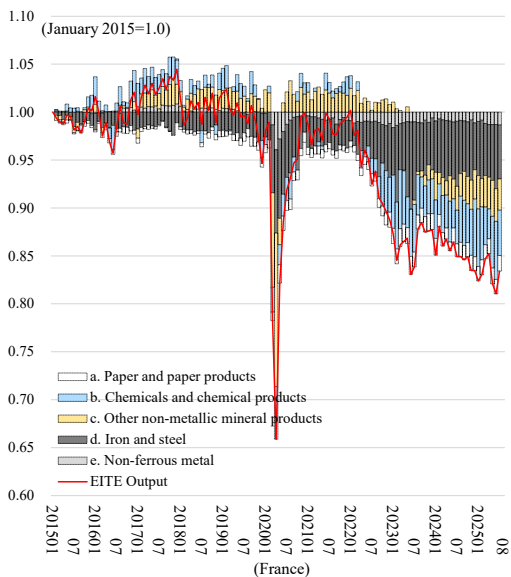

6.2 EITE Output Decomposition

Unit: Index (output in January 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1. Note: The industry contribution is based on the Translog index using the previous year's output value share.

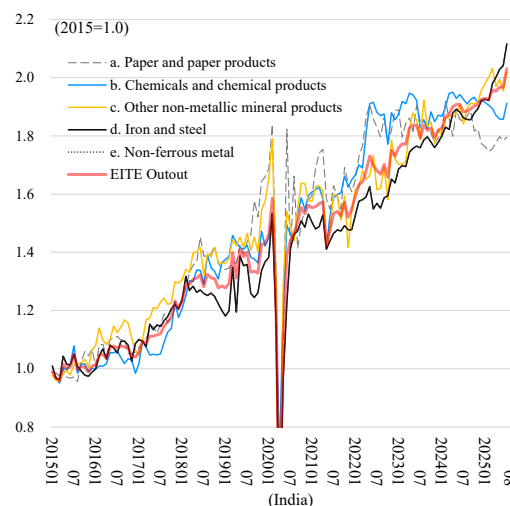

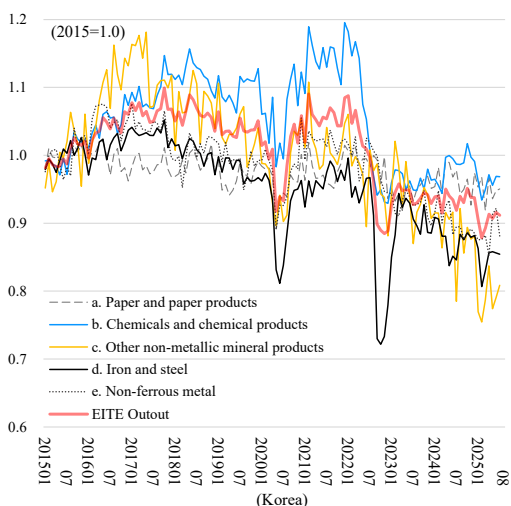

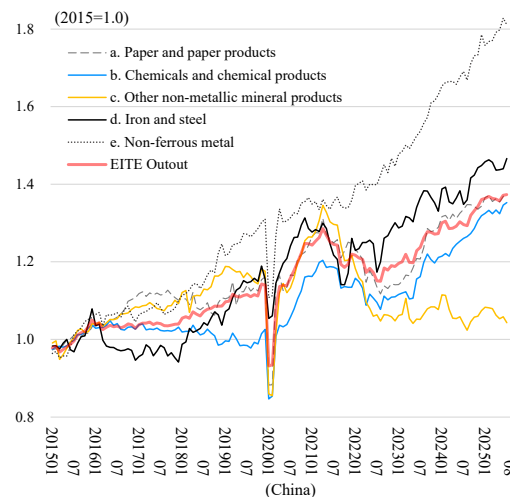

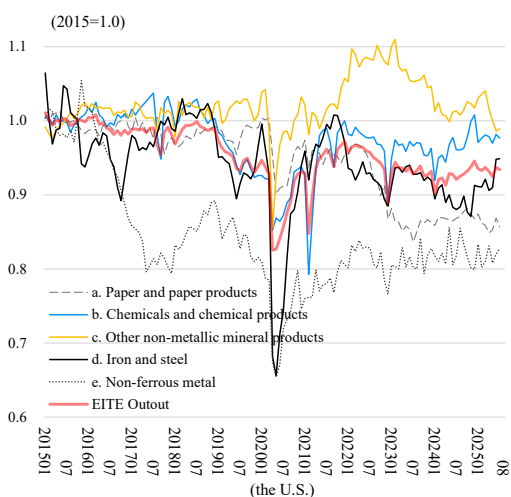

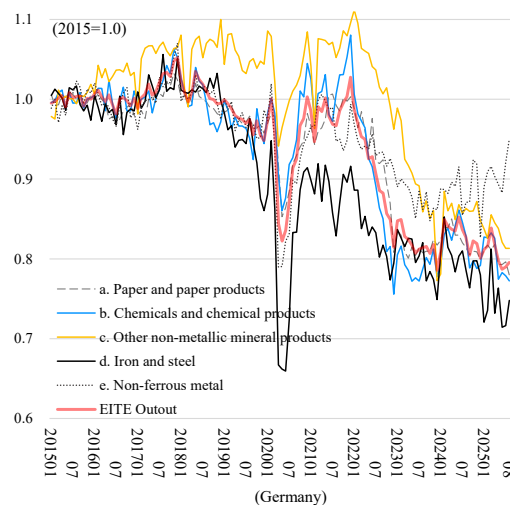

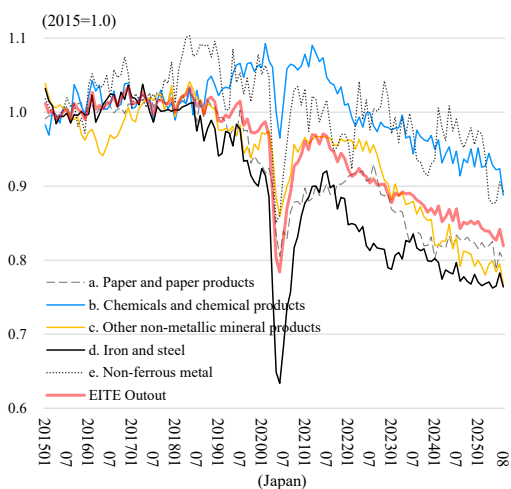

Unit: Index (output in January 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1. Note: The industry contribution is based on the Translog index using the previous year's output value share.

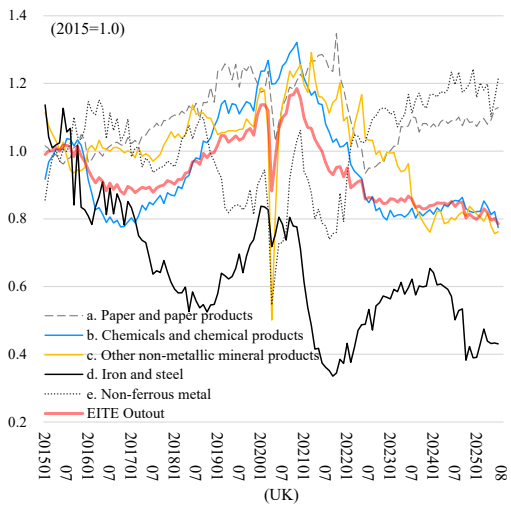

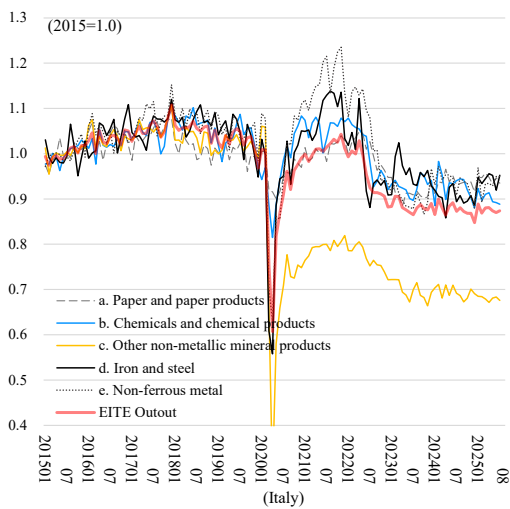

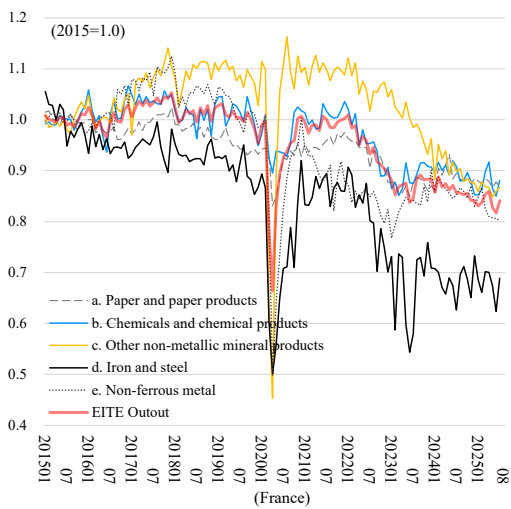

Unit: Index (output in January 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1. Note: The industry contribution is based on the Translog index using the previous year's output value share.

6.3 EITE Output Indices by Country

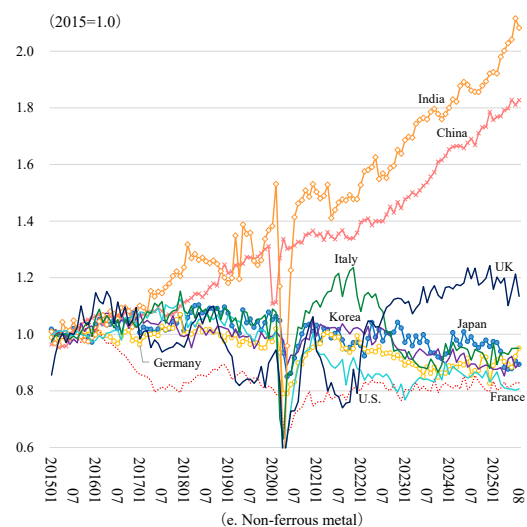

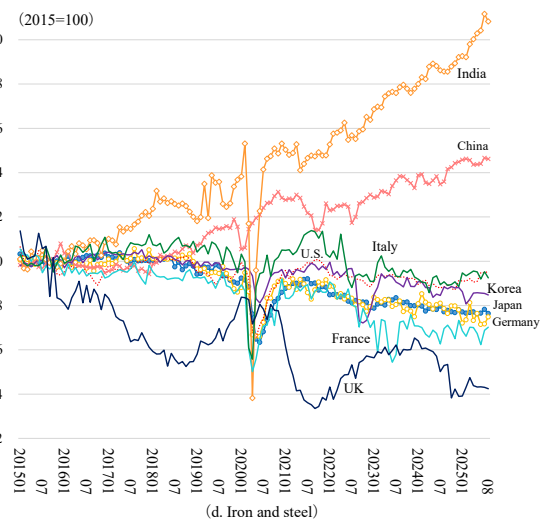

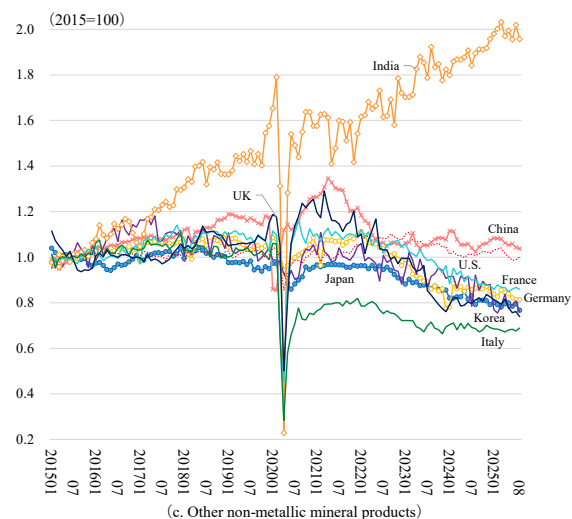

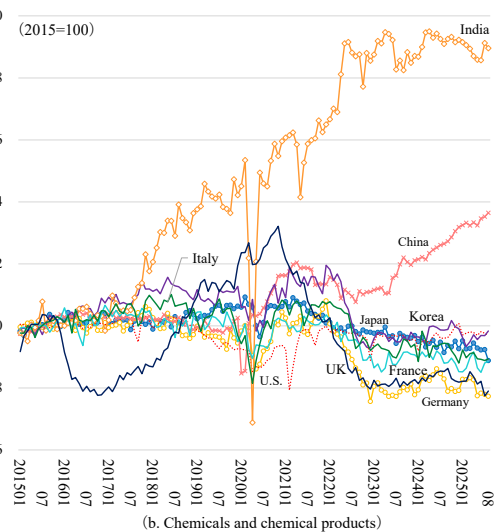

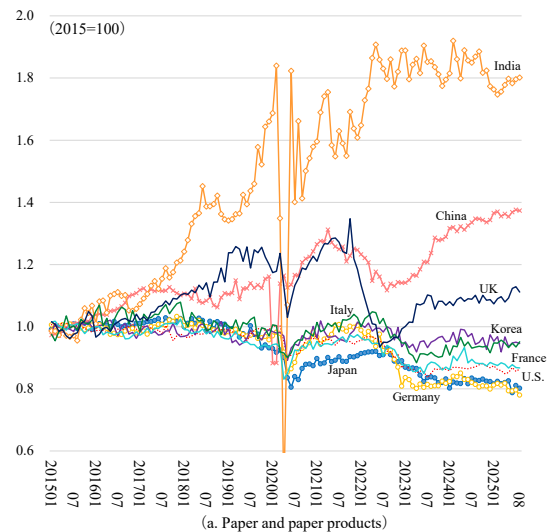

Unit: Index (output in 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1.

Unit: Index (output in 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1.

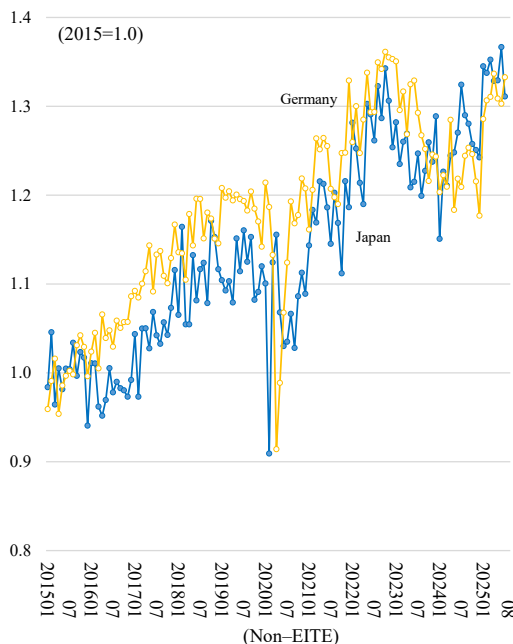

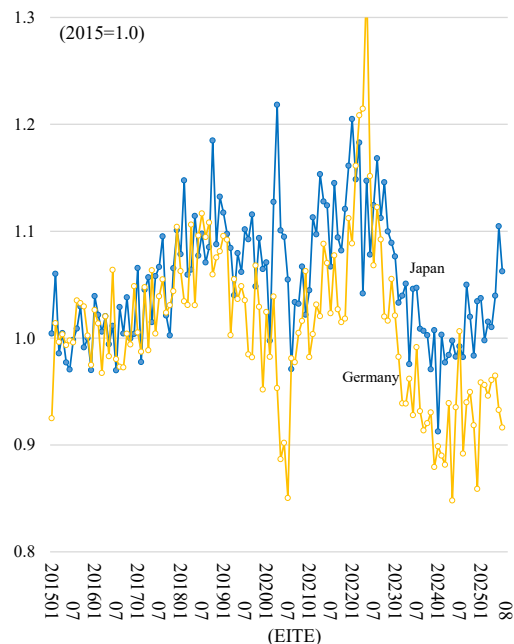

6.4 EITE Output Indices by Industry

Unit: Index (output in 2015=1.0). Period: January 2015– August 2025. Source: see section 6.1.

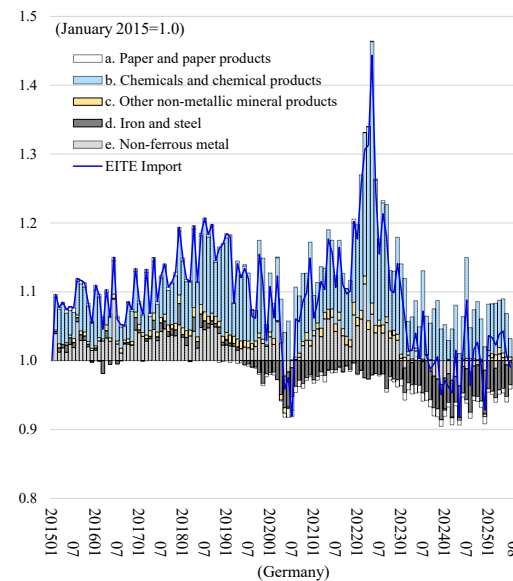

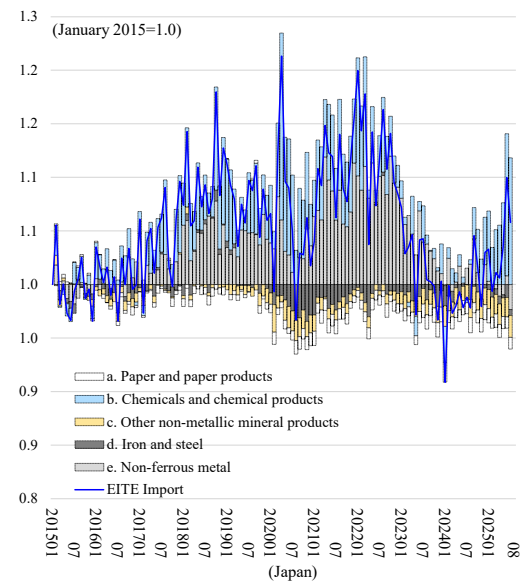

7 EITE Import

5.1 EITE Imports

Unit: Index (import in January 2015=1.0). Period: January 2015– August 2025. Note: Import Indices is based on the Translog index using the previous year's import value share.

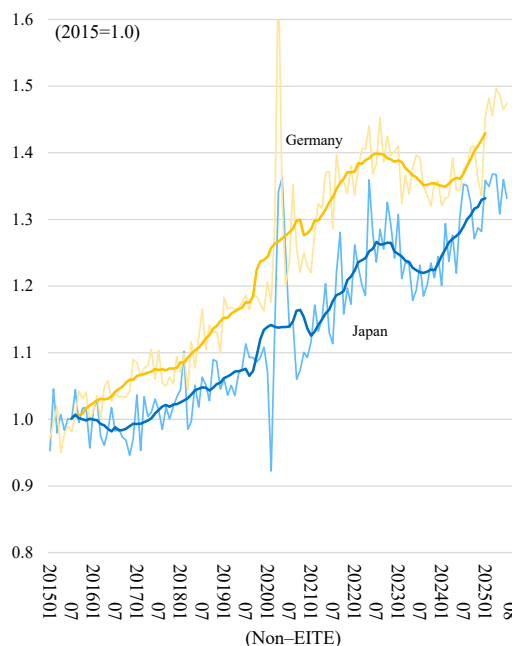

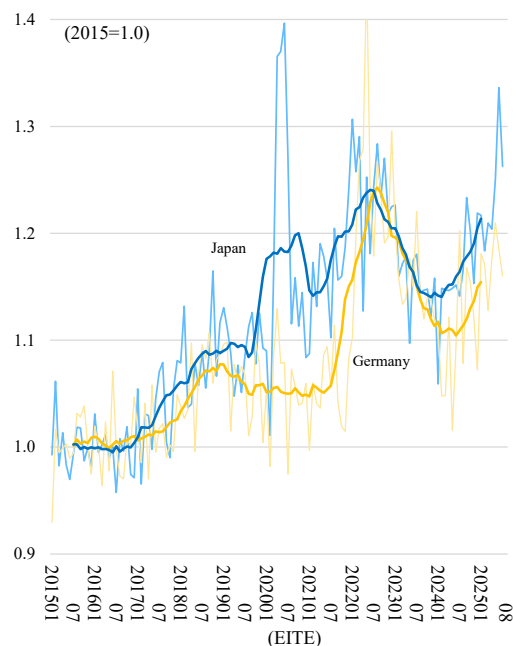

5.2 EITE Import Decomposition

Unit: Index (import in January 2015=1.0). Period: January 2015– August 2025. Note: Import Indices is based on the Translog index using the previous year's import value share.

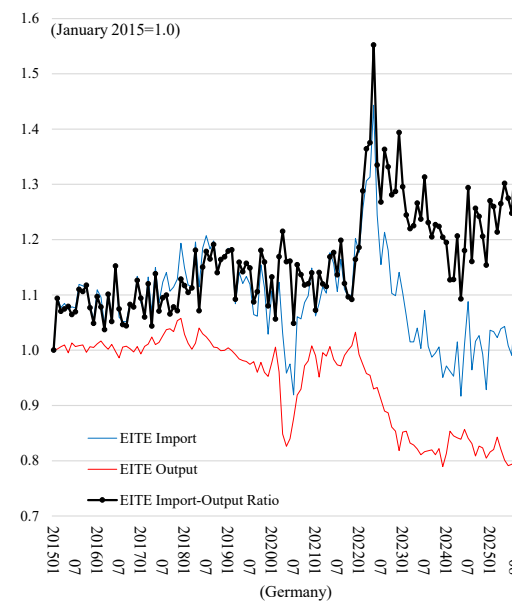

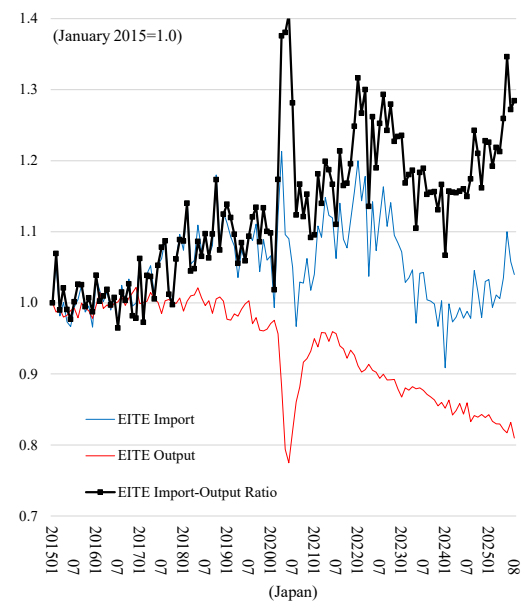

8 EITE Import-Output Ratio

8.1 EITE Import-Output Ratio

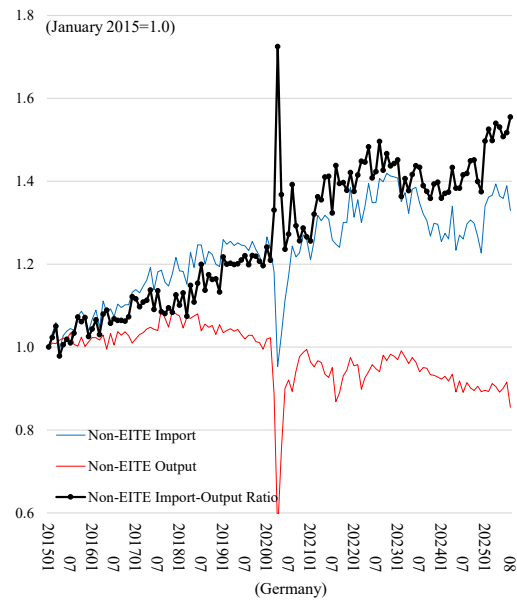

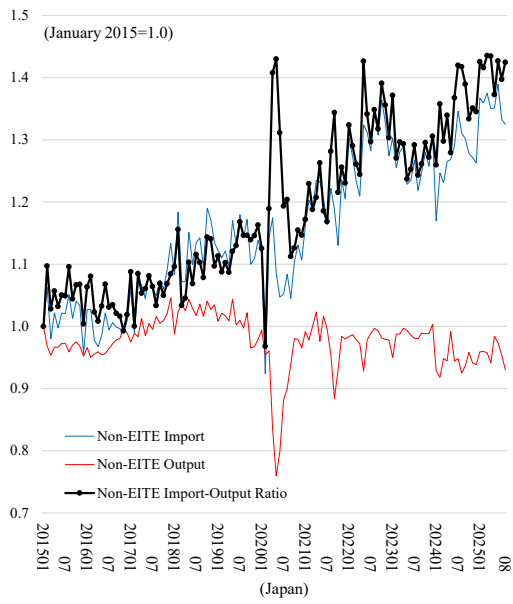

Unit: Index (import and output in January 2015=1.0). Period: January 2015– August 2025.

8.2 EITE Import, Output, and Import-Output Ratio

Unit: Index (import and output in January 2015=1.0). Period: January 2015– August 2025.

8.3 Non-EITE Import, Output, and Import-Output Ratio

Unit: Index (import and output in January 2015=1.0). Period: January 2015– August 2025.
